HOW DO YOU CONVERGE?

CONVERGENCE is a fusion between furniture functions. We have taken storage, seating & technology then brought them together to create a unique and inspiring range to enhance any agile workspace. Where before a product would only perform one task, we have looked at how we can merge tasks into one seamless product to enhance a workplace and provide more value for money than ever before.

Tied to the fact that we can integrate our fantastic locking technologies for ease of use it is a wonder how these products have never been manufactured before. Be a trendsetter and innovate your workspace by combining tasks into one area or product that provides huge cost savings.

CONVERGENCE

Our working experience is changing, we are no longer chained to a desk or chair. Mobile technologies have made our workspaces fluid & flexible, sitting comfortably, harnessing that nomadic explorer freedom in us all.

FURNITURE FUNCTION FUSION

Over the course of history, fixed surfaces, notably used for eating, have advanced to the modern breakout spaces we know today, one of the most widespread furniture items.

Euroworkspace provide a huge range of high-quality breakout product ranges, comprising of furniture which has dual use features integrated into the furniture so activity based working is an actual concept within the workspace.
