# smart working

## the changing office landscape

Modern technology and flexible working patterns are improving the way we work. By working smarter staff achieve a better work-life balance. In turn this results in improved productivity and increased efficiency for businesses.

Smart working practices recognise that people are a key part of the physical office environment. Some of these smart working strategies may be familiar, including flexible working and zoning.

Offering staff the choice to work in the office or from home can be space-saving for a business. Combined with hot or warm-desking the need for individual desk space is reduced.

Another smart strategy is to divide workspaces into zones, each designed to best support a different way of working. Staff can choose the most appropriate space to work in, whether that's alone in a quiet booth, on soft-seating with colleagues, or at a desk.

By empowering employees, we make them more engaged. So businesses who adopt smart working practices can recruit the most skilled individuals. For existing desk-based workers this can be a big cultural change, one that takes time. Either way this is a change that requires the right infrastructure to support it.

Workplace storage can help businesses put smart working practices in place. Space is becoming more functional than personal, but individuals still need a secure place to store their laptops and personal items, which is particularly important at companies with clean-desk policies. This is where the Simplicity storage solution comes in.

Smart working needs smart storage.

zoned work spaces

# simplicity

## features and benefits

- 1 Fully mains powered, saving thousands in battery costs
- 2 Providing a 'one card fits all' solution
- 3 User notifications ensure storage isn't claimed permanently, maximising usable space
- 4 Traffic light system, showing locker availability
- 5 USB charging point for phones or tablets (up to 600Ma max)
- 6 Intruder alarm can be linked to existing system to enhance security
- 7 Integral light improves visibility of contents
- 8 Push-to-open door provides increased security
- 9 Real-time user/access management via web browser, also logs events and utilisation rates
- 10 Users can be set up to a choice of permanent, temporary or group storage assignment
- 11 Integral hinge improves security and minimises maintenance
- 12 Door nose is designed to be flexible and not misalign - so minimal maintenance is required

# access options

use the latest technology to access your storage

## Control Panel

Simplicity lockers have a central control panel. The user scans their access card against a reader. The system finds the user's profile and allocates them an appropriate locker. The locker number displays on the touchscreen terminal. The user then goes to the relevant locker and simply pushes the door to open.

The software allows the lockers to be set to different configurations, including dynamic, static and timed mode. All units are mains powered and include internal USB charger ports. Charging is available for mobile phones or tablets, 600 Ma max.

## Lock Access

Simplicity+ allows users to access the lockers via the lock rather than the control panel. The user taps their access card on the front of the locker (near to the internal lock, marked by an LED light). The LED light on the front shows the lockers status and availability by working on a traffic light status: green for free and red for occupied.

## Software

Get the most from the Simplicity range by using the Releezme software, provided by Vecos. Releezme offers secure access via the Microsoft Azure Software as a Service (SaaS) cloud platform. Releezme is also available as an on-premise edition to meet your specific IT policy.

### Key Functions:

- Set up business rules tailored to dynamic working environments.
- Integrate with your access control or HR system to automate enrollment.
- Send automated notifications to users.

Releezme dashboard

## Mobile App

The Releezme mobile app works alongside your organisation's existing building access card. All IOS/Android users can download this free app with minimal administration support.

The app then makes the user's smartphone act as their own personal terminal, just like Apple Pay.

# pick-up lockers

improve productivity

The internet is fast becoming the destination of choice for shoppers, with an increasing number of us choosing to shop online rather than visit the high street. But receiving the goods you ordered can be far from convenient, particularly if you work full time and aren't at home during standard delivery hours.

Many employees choose to have their orders delivered to their workplace. But this has cost implications for the business. Postal room or reception staff have to spend a significant amount of time handling and distributing parcels.

Alternatively employees choose to work from home, take time off or even leave the office early - reducing business productivity.

My Pick-up Point (MYPUP) lockers solve this problem.

The MYPUP system works in the same way as click-and-collect services used by major retailers, making it much easier for employees to receive parcels without it impacting on either their work or leisure time.

Less hassle for your business and greater work-life balance for your staff.

# technical information

## simplicity

### All major RF standards

Including ISO 14443 A+B (Mifare, Mifare +, Desfire, SmartMX etc), ISO 15693, SONY FeliCa, HID iclass and all LEGIC advant and LEGIC prime transponders.

### Frequency

125Khz or 13.56 Mhz

### Encryption

AES 128/256, 3DES, DES, LEGIC encryption

### Connectivity

Mains powered (no batteries required). Data (TCP/IP) via controller

### USB Output

5V 600mA max

Certification CE

# zones

visuals that add value

We offer a range of storage-finishes that work with your existing furniture. Our Zones concept takes your storage to a whole new level, transforming your workspace with high resolution photography or abstract images, and adding functional value.

Make your storage a feature that showcases your business - display branded visuals or

product images. Use themed imagery to make it easier for staff and visitors to navigate your building. Improve staff well-being by applying motivational quotes or artwork. There are endless possibilities.

We use the latest latex printing technology. We offer super-gloss or matt laminates that are long lasting, scuff-resistant and durable.

# projects

how smart storage can help your business

Office or retail outlet. Gym or university.  
See how workplaces like yours are benefiting from Simplicity:

 [simplicitystorage.co.uk/projects](https://simplicitystorage.co.uk/projects)

“ Because of the removal of pedestals, reduction in desk length and introduction of smart lockers, our physical office space increased by only 15% and yet now has the capacity to house 33% more team members.”

Shenel Unal Global Programme Manager, Essensys

“UBM were really pushing the boundaries in terms of smart building technology, so we had to understand their vision and how we could help fulfil that particular dream – which is now a reality.”

Adrian Cowley Managing Director, Euroworkspace

## how we work

We pride ourselves on ensuring our client's experience with us is exceptional. We're here for you throughout the production and installation process.

01

### expertise

Every client we work with, and every job we complete is unique. Speak to our experts about how we can accommodate your specific storage requirements.

02

### choice

Choose from our range of made-to-measure lockers, or our bespoke in-house design service. We work with you to bring your ideas to life. Draw inspiration from our extensive range of colours and finishes.

03

### quality

Our manufacturing team will turn your vision into a reality. They combine Dutch technology with British engineering. Crafting a product that is both attractive and functional.

04

### support

We work with your facilities and IT teams to ensure your business's transition to Simplicity is easy. Proper adoption of smart technologies takes time. So, even after installation we continue to offer a high level of support.
